

Please do not allow the FCC to implement any proposal that would lessen the effectiveness of the Indiana Telephone Privacy Law. Since we've signed for this protection we can now enjoy a nice quiet dinner or a pleasant evening at home without the interruption of tele-marketers. We used to receive two to three calls each night, and we were so frustrated we considered changing to a private phone number. Since we made the decision to sign up for the Indiana Telephone Privacy Law, we very seldom receive bothersome calls. No longer are we afraid to answer the phone. Please leave this alone, IT WORKS...
